SUMMARY

Creative problem solver turned full-stack developer, blending real-world logistics experience with a sharp eye for clean, user-focused code. Trained through LaunchCode's immersive program, where I built responsive applications using React, Java, Spring Boot, and MySQL. I'm ready to join a collaborative team where I can build scalable systems, ship meaningful features, and keep learning every step of the way.

LANGUAGES | FRAMEWORKS | TOOLS

Java, JavaScript | React, Spring Boot | MySQL Workbench

EXPERIENCE

Your Lawn Guy — LaunchCode Capstone Project
- A streamlined scheduling and service management tool designed for solo lawn care professionals or small landscaping crews
- Built a client management interface with full CRUD functionality and backend persistence via RESTful API
- Designed and implemented modular API endpoints for job creation, updates, and data retrieval using Spring Boot and JDBC
- Designed mobile friendly UI for quick access and updates on the go
- JavaScript, Java, React, Spring Boot, MySQL, JDBC, REST API, IntelliJ, Visual Studio Code

CDL A Driver — Ryder
June 2025 - Present
August 2022 - February 2025
- Transported critical medical supplies to hospitals across the metropolitan area, ensuring timely and secure deliveries
- Logged shipment data using Ryder's digital tracking system, maintaining 98% accuracy in inventory reporting and delivery logs
- Communicate with dispatch and clients to resolve delivery issues in real time, demonstrating strong problem-solving and customer service skills
- Adapt to changing logistics and weather conditions, consistently meeting delivery deadlines and maintaining a 95% on-time record

CDL A Driver — Medline
February 2025 - May 2025
- Delivered medical supplies to hospitals and other medical facilities across Missouri/Illinois, maintaining strict adherence to delivery schedules and regulatory protocols
- Resolved delivery discrepancies and client concerns on-site, demonstrating clear communication and real-time problem-solving
- Maintained compliance with HIPAA and safety standards during transport of sensitive medical equipment and documentation
